[71] Description

Outside of the hospital more than 1000 of people are waiting for medical support of all kinds.

### **Sub Section: What Is The Problem?**

[67] Definition

Lack of medical supplies and electricity makes the work of medical staff virtually impossible, as powerlines are cut off.

### **Sub Section: What Caused The Problem?**

[66] Analysis

The earthquake of January 12th has destroyed most of the infrastructure in Port-au-Prince, including the electricity network. The immense number of victims have dried up medical supplies.

### **Sub Section: What Is This Project Going To Do About The Problem?**

[69] Activities

Generators enable provision of electricity independent of standing infrastructure. With enough fuel, they can run without stopping. This project consists of the acquisition of 1000 liters of fuel. Furthermore, 300 large medical kits are provided.

### **Sub Section: What Are The Concrete Goals Of This Project?**

[68] Goals

1000 liters of fuel for generators 300 large medical kits

### **Sub Section: What Are The Expected Results?**

[70] Results

1. Emergency electricity supply continues to work.
2. Improved working conditions of medical staff
3. Increased ability to provide medical support
4. 300 medical kits are distributed

### **Sub Section: What Are Potential Threats To This Project?**

[79] Threats

1. Lack of materials. This risk is by-passed through our local contacts, who have secured the availability of the generators as well as fuel.
2. Lack of opportunities to transfer money to local agents. This problem is expected to be solved within days

### **Sub Section: Who's MOVING This Project?**
